

Using the Doccla App on a Tablet

Some people prefer to use a tablet instead of a phone to access the Doccla app. This is absolutely fine and here's exactly how to do it:

Open the App Store or Google Play Store

- On iPad or other Apple tablets: Open the App Store
- On Android tablets (Samsung, Lenovo, etc.): Open the Google Play Store

Search for the Doccla App

- Tap the search bar at the top of the store
- Type "Doccla"
- Look for the app with the Doccla logo

Download the App

- Tap the Download (App Store) or Install (Google Play) button
- Wait until the app has finished downloading to your tablet

Log In

- Open the app once it has installed
- Enter the username and temporary password you received in your text invitation (If you already created a new password, use that instead)

You're Ready to Go

- After logging in, you can use the app on your tablet in the same way as on a smartphone
- Your information and setup will stay the same across devices
