

## 7.5 Action card – Suspected HCID ongoing management- Domestic services

Domestic services manager		
Responsible for decontamination		
Situation: You are informed about a patient with suspected HCID in a healthcare facility		
Actions (all must be performed):	Notes	Done
Ensure adequate staffing available	Staff will need to have been trained in safe use of HCID PPE, and will need to work in a pair with one in the contaminated area and the other to work as the 'buddy' to assist with doffing PPE	
Decontaminate exposed areas	As a terminal clean using 1000ppm Chlorine Disinfectant (Actichlor/TitanChlor).  Wearing appropriate PPE as per National Infection and Prevention Control Scotland manual guidance
